

PRINCE PAL

Mumbai, Maharashtra, India | +91 93217 83320 | princevpal11@gmail.com | linkedin.com/in/princepal11 | github.com/PortalCrown711

PROFESSIONAL SUMMARY

Full-Stack Developer and MCA candidate skilled in Angular, Node.js, and Generative AI. Infosys Springboard intern, published researcher, and hackathon participant (NASA Space Apps, Google Agentic AI). Passionate about building scalable, user-centric software.

EDUCATION

Thakur Institute of Management Studies, Career Development & Research <i>Master of Computer Applications (MCA)</i>	Mumbai, India Aug. 2025 – Aug. 2027
Vidyalankar School of Information Technology <i>Bachelor of Science in Information Technology (B.Sc. IT)</i>	Mumbai, India 2022 – 2025
Ramniranjan Jhunjhunwala College <i>Higher Secondary Certificate (HSC) – Science</i>	Mumbai, India Aug. 2020 – June 2022

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, Python, SQL
Frontend: Angular, React.js, Bootstrap, Tailwind CSS
Backend: Node.js, Express.js
Database: MySQL
Tools & Platforms: Git, GitHub, VS Code
AI & Emerging Tech: Generative AI, Prompt Engineering, LLM Integration
Concepts: OOP, REST APIs, Responsive Design, Agile, SDLC
Currently Learning: Data Structures & Algorithms (DSA)

EXPERIENCE

Angular Developer Intern <i>Infosys Springboard</i>	Remote Feb. 2026 – Apr. 2026
- Contributed to Skills Build, a full-stack volunteer-NGO matching platform, collaborating in a cross-functional team of 7 using Angular, Node.js, Express.js, and MySQL. - Built a responsive, component-driven UI integrating RESTful APIs for volunteer registration, NGO dashboards, and smart-matching features. - Followed Agile sprint cycles, maintained clean Git commit history, and participated in structured peer code reviews.	
Proctor & Invigilator <i>AON Assessments</i>	Mumbai, India 2024 (2 months) & 2025 (2 months)
Administered secure online and offline assessments for large candidate pools, ensuring compliance, identity verification, exam integrity, and resolving live technical issues.	

PROJECTS

Full-Stack Pizza Ordering Web Application <i>HTML, CSS, JavaScript, Node.js, MySQL</i>	2025
Built an end-to-end ordering system with customer menu, cart, and admin dashboard; implemented persistent order storage with MySQL and a fully responsive UI.	
MobiMouse: Remote Desktop Cursor Control via Mobile Device <i>Published Research</i>	2024
Designed and implemented a real-time mobile-to-desktop cursor control system over a local network; research paper published and peer-reviewed.	
Personal Portfolio Website <i>HTML5, CSS3, JavaScript</i>	2024
Designed and deployed a fully responsive portfolio website, optimised for performance and cross-device compatibility; source available on GitHub.	

HACKATHONS

NASA Space Apps Challenge <i>Global Hackathon</i>	2024
Collaborated in a team to design and prototype a data-driven web application tackling a real-world space/Earth science problem within a 48-hour global sprint.	
Google Agentic AI Hackathon <i>AI / Generative AI</i>	2025
Built an agentic AI application using Google's LLM APIs, demonstrating autonomous task execution and practical expertise in Generative AI and Prompt Engineering.	

CERTIFICATIONS & PUBLICATIONS

Google Cloud: Intro to Responsible AI, Intro to Large Language Models, Intro to Generative AI (Aug 2024)
Other: Prompt Engineering, Generative AI (*Infosys Springboard*); Diploma in Software Engineering (*Intech*); AI/ML for GeoData Analytics (*IIRS, ISRO*); Web Dev Simulation (*Forage*); Soft Skills (*TCS iON*)
Publication: MobiMouse: Remote Desktop Cursor Control via Mobile Device – *Peer-reviewed research on cross-platform mobile-to-desktop input control.*
